Figures

Student Booklet

Name: _____
Class: _____

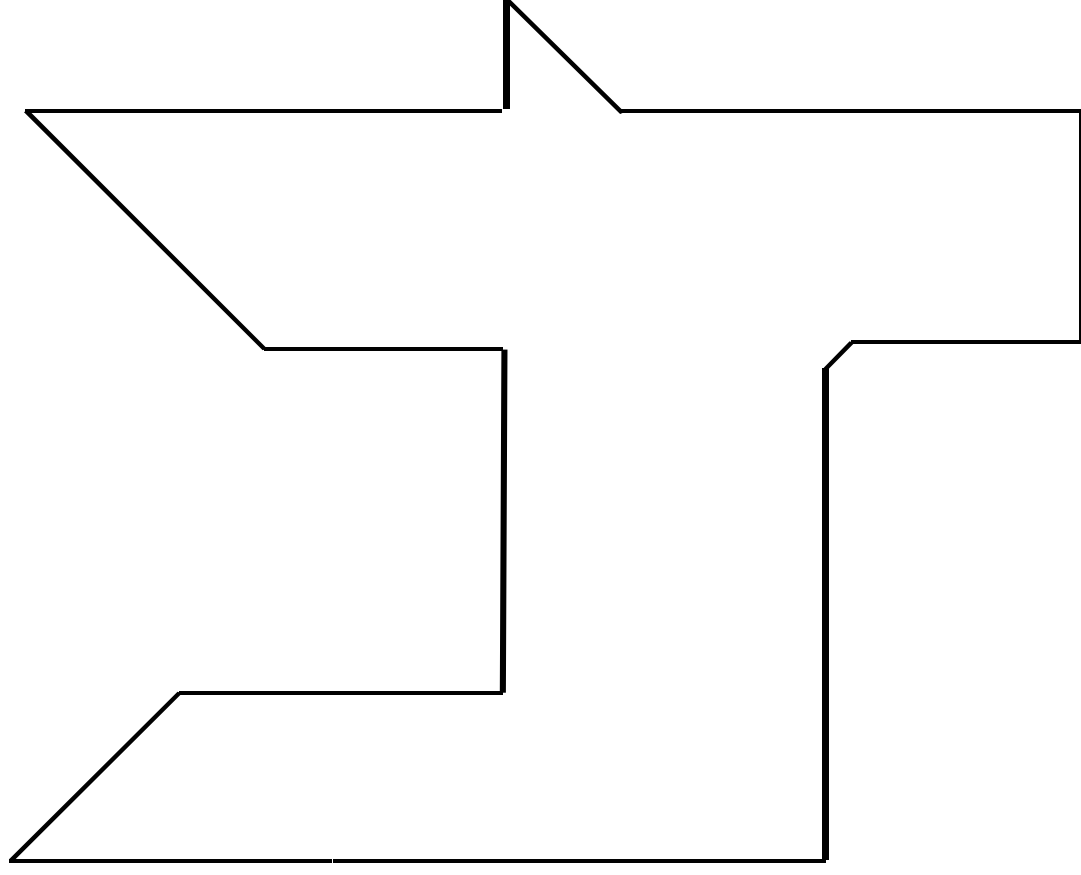

Note to the Student:

The following pages provide outlines for the challenges that appear on each card.

Solve each challenge by first covering a particular shape with the seven Tangram pieces then represent each piece of each solution by drawing lines in the correct place.

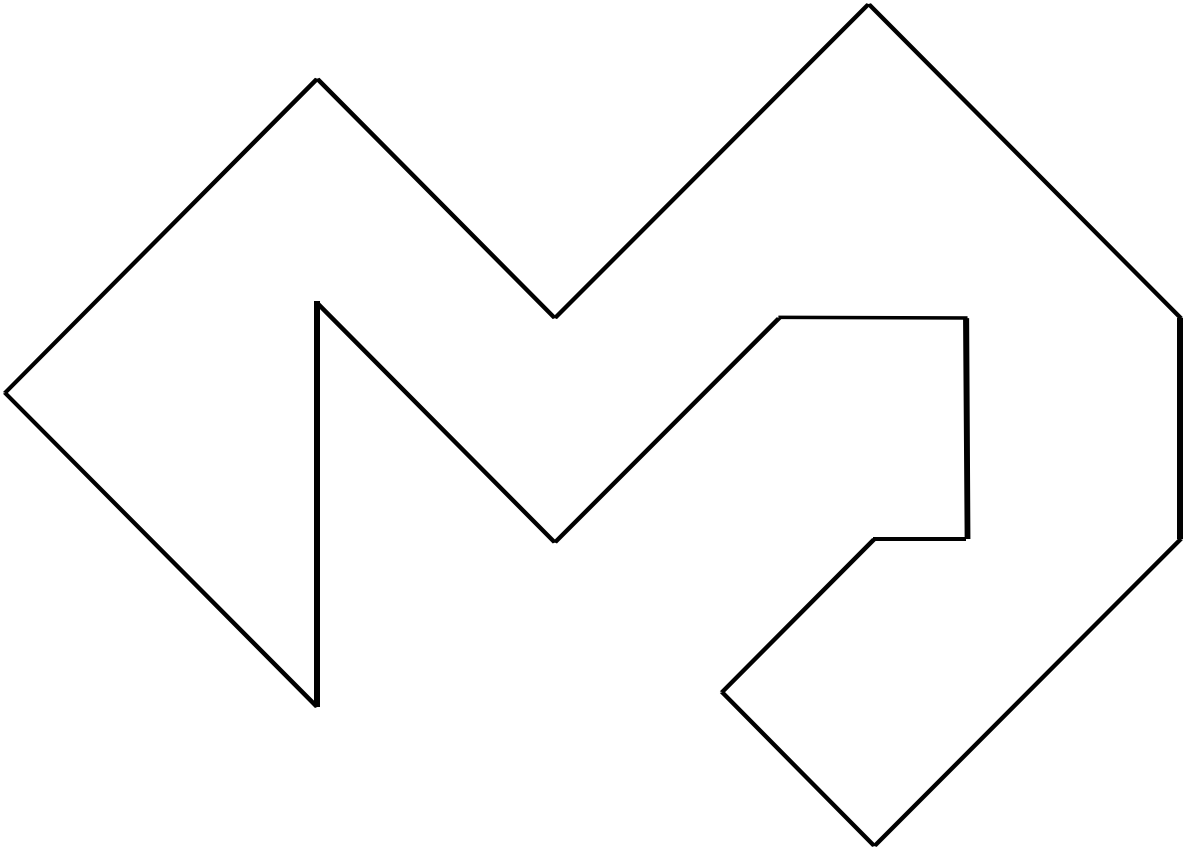

Once you have your lines drawn, you should colour each shape or use some other method to present your solution. Try this alternative: Ask an adult to spray paint river sand three different colours. Next glue the sand to the shapes. It won't be easy but the result will be worth the effort. Ask your teacher to display the completed figures in the classroom.

Have fun!
