

Tangram

Outlines

Solution Booklet 1

Shapes and Sizes © 2006

# 25

Note to the teacher:

The following few pages provide solutions to the Tangram challenges that appear in this set.

The objective of the laminated cards is to develop basic recognition. Younger children are encouraged to complete the challenge by placing the appropriate shape in the correct place until the figure is completely covered.

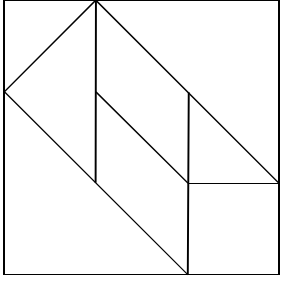

Once basic recognition has been established and children can draw lines – they could be asked to record their solutions in the student booklet. This gives the teacher an opportunity to assess their progress and provide additional assistance where necessary. The outlined solutions could also be coloured in and used to decorate the classroom.
